4	Subject:Sanskriti Leadership Program Dear Parents Greetings of the day. India is growing and moving forward with confidence, new ideas, and big dreams. This New India will need strong and responsible leaders to guide it. These leaders can be future CEOs, teachers, principals, or even leaders of our country. And remember, these leaders can be our children. Keeping this in mind, we are proud to introduce the Sanskriti Leadership Program,a platform that will help our children develop leadership skills through different activities throughout the year. We are looking for leaders within our own school—students who are ready to step forward, take responsibility, and inspire others. Children who believe they can guide their peers in the right direction have an opportunity to do so. 5	Subject:Update regarding bus transport Dear Parents, Greetings of the day. The new Academic Year 2026-27 has started successfully. The school is buzzing with excitement as the children meet their new teachers, new classmates and bus mates. Like every year, the children will take a few days to settle in the new set-up. Till then, they need our support and patience. The school staff does its best to make their transition during this period as comfortable as possible. One of the challenges that hampers the smooth functioning of the school staff is the changes or communication done by parents at a very short notice. Since the bus pick and drop points are shared before the beginning of the session, we expect and request the parents to reach out to us for any correction/verification before the first day. It is impossible to attend to related communication after the starting of the session. Any communication via mail also requires a minimum of 1-2 working days to be acted upon. 47	Subject: Important Update Dear Parents, We hope you are enjoying the summer break with your wards. We are reaching out to you during this time because the situation in our country warrants that we think ahead. The ongoing global developments and the national conversation around energy conservation have created a possibility. Not a certainty, but a real possibility that schools across India may need to shift to online learning for a period. We don't know if or when this will be required. What we do know is that if it does happen, we want Sanskriti to be ready for our students. With this in mind, we have begun a preparedness exercise. As a school that believes in transparency and always acts in the best interest of our children, we will keep you posted about future developments. The National Education Policy (NEP) envisions India emerging as a global leader in rapidly evolving fields such as Artificial Intelligence (AI), Machine Learning (ML), Data Analytics, and other advanced technologies. In alignment with the NEP and the recommendations of the National Curriculum Framework, CBSE has emphasized the development of AI-ready learners through the integration of Computational Thinking (CT) skills into the curriculum. These skills enable students to develop logical reasoning, problem-solving abilities, pattern recognition, and a deeper understanding of the role of technology and AI in everyday life.
